

ENGINE ALARMS

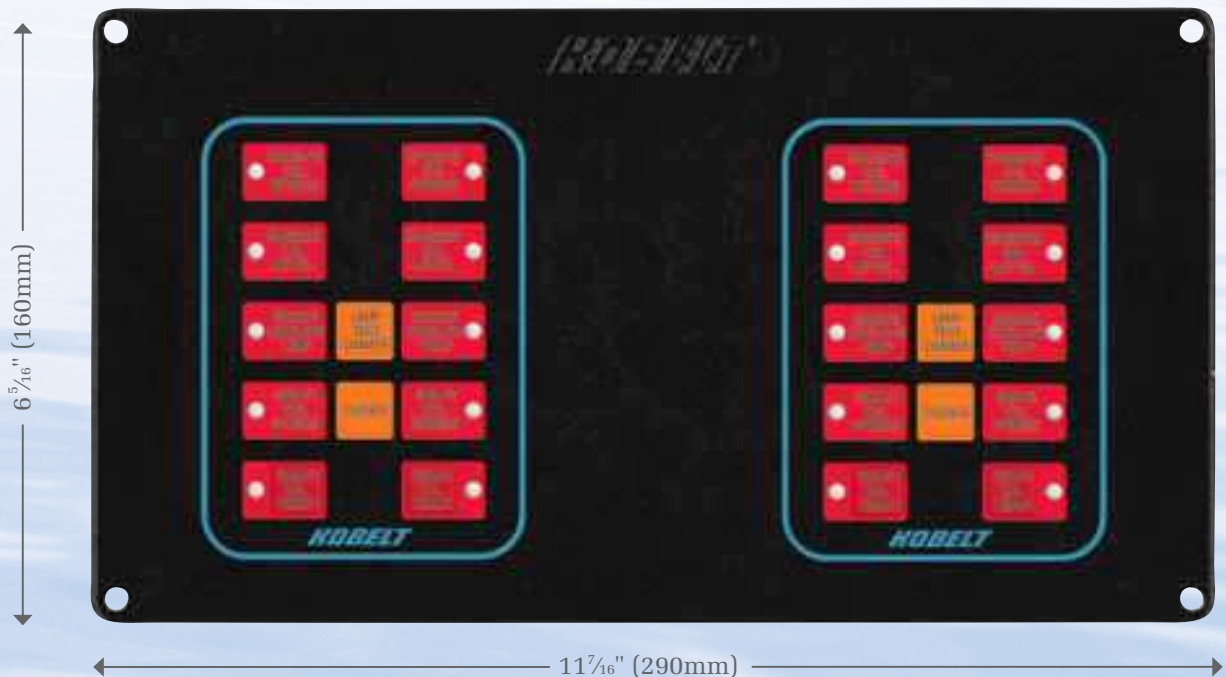

Introducing Kobelt's new engine alarm system for one or two station twin engine applications. The contemporary design using membrane switches displays a total of 10 alarm points, 3 points per engine and 2 points per gear.

6511-APE10

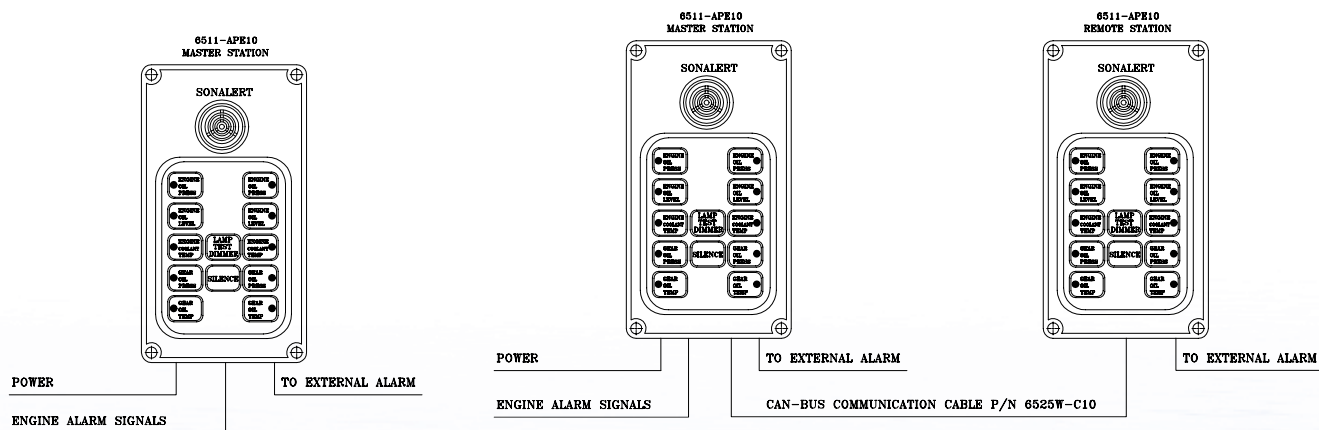

can be installed for 1 or 2 stations

To handle 4 engines, Kobelt has provided a bigger panel with 2 twin engine alarm systems.

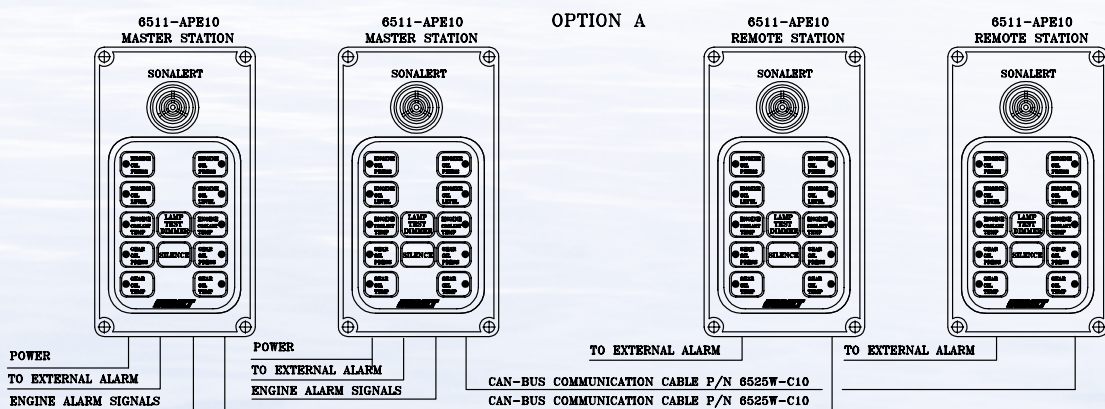

KOBELT

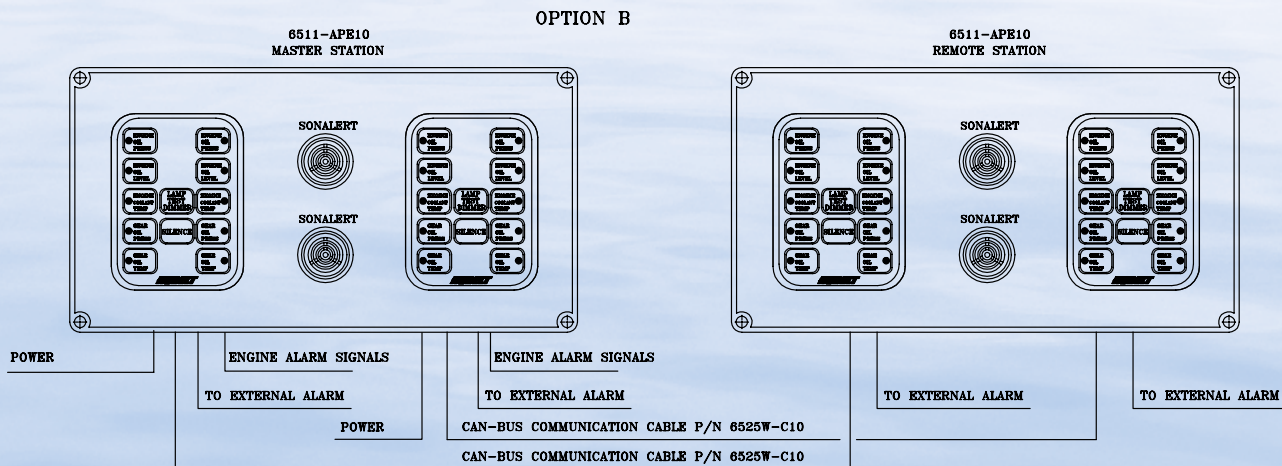

▽ 6511-APE10 Single Station/Double Station Engine Alarm

▽ 6511-APE10 Single Station/Double Station 4 Engine Alarm
